Backend
- Node.js, Express, MongoDB
- PHP, Laravel
- Management of relational databases such as MySQL
- Wordpress (+ custom template), WooCommerce

HOBBIES & INTERESTS

In my free time, I am passionate about **learning languages**, especially Asian ones.
The complexity of these languages drives me to **persevere and face challenges** with curiosity and determination. Additionally, I love **reading** classics (but not only). This mindset is reflected in my approach to development, where I am accustomed to **quickly adapting to new technologies** and effectively solving complex problems.
